

# AZURE CLI COMMANDS

| AZ COMMANDS          |  |
|----------------------|--|
| az account           | Manage Azure subscription information.   |
| az acr               | Manage private registries with Azure Container Registries.                         |
| az acs               | Manage Azure Container Services.   |
| az ad                | Manage Azure Active Directory Graph entities needed for Role Based Access Control. |
| az advisor           | Manage Azure Advisor.  |
| az afd               | Manage Azure Front Door.   |
| az ai-examples       | Add AI powered examples to help content.   |
| az aks               | Manage Azure Kubernetes Services.  |
| az alias             | Manage Azure CLI Aliases.  |
| az ams               | Manage Azure Media Services resources.   |
| az apim              | Manage Azure API Management services.  |
| az appconfig         | Manage App Configurations.   |
| az appservice        | Manage App Service plans.  |
| az arcappliance      | Commands to manage an Appliance resource.  |
| az arcddata          | Commands for using Azure Arc-enabled data services.                                |
| az aro               | Manage Azure Red Hat OpenShift clusters.   |
| az artifacts         | Manage Azure Artifacts.  |
| az attestation       | Manage Microsoft Azure Attestation (MAA).  |
| az automation        | Manage Automation.   |
| az azurestackhci     | Manage azurestackhci.  |
| az backup            | Manage Azure Backups.  |
| az baremetalinstance | (PREVIEW) Manage BareMetal Instances.  |
| az batch             | Manage Azure Batch.  |
| az batchai           | Manage Batch AI resources.   |
| az bicep             | Bicep CLI command group.   |
| az billing           | Manage Azure Billing.  |
| az blockchain        | Manage blockchain.   |
| az blueprint         | Commands to manage blueprint.  |
| az boards            | Manage Azure Boards.   |
| az bot               | Manage Microsoft Azure Bot Service.  |
| az cache             | Commands to manage CLI objects cached using the --defer argument.                  |
| az capacity          | Manage capacity.   |
| az cdn               | Manage Azure Content Delivery Networks (CDNs).                                     |
| az cli-translator    | Translate ARM template or REST API to CLI scripts.                                 |

|  |  |
|--|--|
| <a href="#">az cloud</a>                 | Manage registered Azure clouds.  |
| <a href="#">az cloud-service</a>         | Manage cloud service (extended support).                                 |
| <a href="#">az codespace</a>             | Manage Visual Studio Codespaces.   |
| <a href="#">az cognitiveservices</a>     | Manage Azure Cognitive Services accounts.                                |
| <a href="#">az communication</a>         | Manage communication service with communication.                         |
| <a href="#">az config</a>                | Manage Azure CLI configuration.  |
| <a href="#">az configure</a>             | Manage Azure CLI configuration. This command is interactive.             |
| <a href="#">az confluent</a>             | Manage confluent resources.  |
| <a href="#">az connectedk8s</a>          | Commands to manage connected kubernetes clusters.                        |
| <a href="#">az connectedmachine</a>      | Manage Connected Machine.  |
| <a href="#">az connectedvmware</a>       | Commands to manage Connected VMware.                                     |
| <a href="#">az consumption</a>           | Manage consumption of Azure resources.                                   |
| <a href="#">az container</a>             | Manage Azure Container Instances.  |
| <a href="#">az cosmosdb</a>              | Manage Azure Cosmos DB database accounts.                                |
| <a href="#">az costmanagement</a>        | Manage cost and billing in Azure.  |
| <a href="#">az csvmware</a>              | Manage Azure VMware Solution by CloudSimple.                             |
| <a href="#">az customlocation</a>        | Commands to Create, Get, List and Delete CustomLocations.                |
| <a href="#">az custom-providers</a>      | Commands to manage custom providers.                                     |
| <a href="#">az databox</a>               | Manage databox.  |
| <a href="#">az databoxedge</a>           | Support data box edge device and management.                             |
| <a href="#">az databricks</a>            | Manage databricks workspaces.  |
| <a href="#">az datadog</a>               | Manage datadog.  |
| <a href="#">az datafactory</a>           | Manage Data Factory.   |
| <a href="#">az dataprotection</a>        | Manage Data Protection.  |
| <a href="#">az datashare</a>             | Commands to manage datashare.  |
| <a href="#">az dedicated-hsm</a>         | Dedicated-hsm to create, update, list, show, and delete HSMs.            |
| <a href="#">az demo</a>                  | Demos for designing, developing and demonstrating Azure CLI.             |
| <a href="#">az deployment</a>            | Manage Azure Resource Manager template deployment at subscription scope. |
| <a href="#">az deploymentmanager</a>     | Create and manage rollouts for your service.                             |
| <a href="#">az deployment-scripts</a>    | Manage deployment scripts at subscription or resource group scope.       |
| <a href="#">az desktopvirtualization</a> | Manage desktop virtualization.   |
| <a href="#">az devops</a>                | Manage Azure DevOps organization level operations.                       |
| <a href="#">az disk</a>                  | Manage Azure Managed Disks.  |
| <a href="#">az disk-access</a>           | Manage disk access resources.  |
| <a href="#">az disk-encryption-set</a>   | Disk Encryption Set resource.  |

|                      |   |
|----------------------|---|
| az disk-pool         | Manage Azure disk pool.   |
| az dla               | Manage Data Lake Analytics accounts, jobs, and catalogs.  |
| az dls               | Manage Data Lake Store accounts and filesystems.  |
| az dms               | Manage Azure Data Migration Service (DMS) instances.  |
| az dnc               | Manage Delegated Network.   |
| az dt                | Manage Azure Digital Twins solutions & infrastructure.  |
| az elastic           | Manage Microsoft Elastic.   |
| az eventgrid         | Manage Azure Event Grid topics, domains, domain topics, system topics partner topics, event subscriptions, system topic event subscriptions and partner topic event subscriptions.          |
| az eventhubs         | Manage Azure Event Hubs namespaces, eventhubs, consumergroups and geo recovery configurations - Alias.  |
| az extension         | Manage and update CLI extensions.   |
| az feature           | Manage resource provider features.  |
| az feedback          | Send feedback to the Azure CLI Team.  |
| az find              | I'm an AI robot, my advice is based on our Azure documentation as well as the usage patterns of Azure CLI and Azure ARM users. Using me improves Azure products and documentation.          |
| az footprint         |   |
| az functionapp       | Manage function apps. To install the Azure Functions Core tools see <a href="https://github.com/Azure/azure-functions-core-tools">https://github.com/Azure/azure-functions-core-tools</a> . |
| az fzf               | Commands to select active or default objects via fzf.   |
| az graph             | Query the resources managed by Azure Resource Manager.  |
| az group             | Manage resource groups and template deployments.  |
| az guestconfig       | Manage Guest Configuration.   |
| az hanainstance      | (PREVIEW) Manage Azure SAP HANA Instance.   |
| az hdinsight         | Manage HDInsight resources.   |
| az healthbot         | Manage bot with healthbot.  |
| az healthcareapis    | Manage Healthcare Apis.   |
| az hpc-cache         | Commands to manage hpc cache.   |
| az identity          | Managed Service Identities.   |
| az image             | Manage custom virtual machine images.   |
| az import-export     | Manage Import Export.   |
| az init              | It's an effortless setting up tool for configs.   |
| az interactive       | Start interactive mode. Installs the Interactive extension if not installed already.  |
| az internet-analyzer | Commands to manage internet analyzer.   |
| az iot               | Manage Internet of Things (IoT) assets.   |
| az k8sconfiguration  | Commands to manage Kubernetes configuration.  |

|                                      |  |
|--------------------------------------|--|
| <a href="#">az k8s-configuration</a> | Commands to manage resources from Microsoft.KubernetesConfiguration.   |
| <a href="#">az k8s-extension</a>     | Commands to manage Kubernetes Extensions.  |
| <a href="#">az keyvault</a>          | Manage KeyVault keys, secrets, and certificates.   |
| <a href="#">az kusto</a>             | Manage Azure Kusto resources.  |
| <a href="#">az lab</a>               | Manage Azure DevTest Labs.   |
| <a href="#">az local-context</a>     | Manage Local Context.  |
| <a href="#">az lock</a>              | Manage Azure locks.  |
| <a href="#">az logic</a>             | Manage Logic.  |
| <a href="#">az logicapp</a>          | Manage logic apps.   |
| <a href="#">az login</a>             | Log in to Azure.   |
| <a href="#">az logout</a>            | Log out to remove access to Azure subscriptions.   |
| <a href="#">az logz</a>              | Manage Microsoft Logz.   |
| <a href="#">az maintenance</a>       | Manage Maintenance.  |
| <a href="#">az managedapp</a>        | Manage template solutions provided and maintained by Independent Software Vendors (ISVs).  |
| <a href="#">az managed-cassandra</a> | Azure Managed Cassandra.   |
| <a href="#">az managedservices</a>   | Manage the registration assignments and definitions in Azure.  |
| <a href="#">az managementpartner</a> | Allows the partners to associate a Microsoft Partner Network(MPN) ID to a user or service principal in the customer's Azure directory. |
| <a href="#">az maps</a>              | Manage Azure Maps.   |
| <a href="#">az mariadb</a>           | Manage Azure Database for MariaDB servers.   |
| <a href="#">az mesh</a>              | (PREVIEW) Manage Azure Service Fabric Mesh Resources.  |
| <a href="#">az ml</a>                | Manage Azure Machine Learning resources.   |
| <a href="#">az ml</a>                | Manage Machine Learning resources.   |
| <a href="#">az monitor</a>           | Manage the Azure Monitor Service.  |
| <a href="#">az mysql</a>             | Manage Azure Database for MySQL servers.   |
| <a href="#">az netappfiles</a>       | Manage Azure NetApp Files (ANF) Resources.   |
| <a href="#">az network</a>           | Manage Azure Network resources.  |
| <a href="#">az next</a>              | Recommend the possible next set of commands to take.   |
| <a href="#">az notification-hub</a>  | Manage Notification Hubs.  |
| <a href="#">az offazure</a>          | Manage on-premise resources for migrate.   |
| <a href="#">az openshift</a>         | Manage Azure Red Hat OpenShift 3.11 clusters.  |
| <a href="#">az peering</a>           | Manage peering.  |
| <a href="#">az pipelines</a>         | Manage Azure Pipelines.  |
| <a href="#">az policy</a>            | Manage resource policies.  |
| <a href="#">az portal</a>            | Manage Portal.   |
| <a href="#">az postgres</a>          | Manage Azure Database for PostgreSQL servers.  |

|   |  |
|---|--|
| <a href="#">az powerbi</a>                  | Manage PowerBI resources.  |
| <a href="#">az ppg</a>                      | Manage Proximity Placement Groups.   |
| <a href="#">az provider</a>                 | Manage resource providers.   |
| <a href="#">az providerhub</a>              | Manage resources with ProviderHub.   |
| <a href="#">az purview</a>                  | Manage Purview.  |
| <a href="#">az quantum</a>                  | Manage Azure Quantum Workspaces and submit jobs to Azure Quantum Providers.  |
| <a href="#">az redis</a>                    | Manage dedicated Redis caches for your Azure applications.   |
| <a href="#">az redisenterprise</a>          | Manage dedicated Redis Enterprise caches for your Azure applications.  |
| <a href="#">az relay</a>                    | Manage Azure Relay Service namespaces, WCF relays, hybrid connections, and rules.  |
| <a href="#">az remote-rendering-account</a> | Manage remote rendering account with mixed reality.  |
| <a href="#">az repos</a>                    | Manage Azure Repos.  |
| <a href="#">az reservations</a>             | Manage Azure Reservations.   |
| <a href="#">az resource</a>                 | Manage Azure resources.  |
| <a href="#">az resource-mover</a>           | Move resources in Azure.   |
| <a href="#">az rest</a>                     | Invoke a custom request.   |
| <a href="#">az role</a>                     | Manage user roles for access control with Azure Active Directory and service principals.                                 |
| <a href="#">az sapmonitor</a>               | (PREVIEW) Manage Azure SAP Monitor.  |
| <a href="#">az search</a>                   | Manage Azure Search services, admin keys and query keys.   |
| <a href="#">az security</a>                 | Manage your security posture with Azure Security Center.   |
| <a href="#">az self-test</a>                | Runs a self-test of the CLI.   |
| <a href="#">az sentinel</a>                 | Manage Security Insight.   |
| <a href="#">az serial-console</a>           | Connect to the Serial Console of a Linux/Windows Virtual Machine or VMSS Instance.                                       |
| <a href="#">az servicebus</a>               | Manage Azure Service Bus namespaces, queues, topics, subscriptions, rules and geo-disaster recovery configuration alias. |
| <a href="#">az sf</a>                       | Manage and administer Azure Service Fabric clusters.   |
| <a href="#">az sig</a>                      | Manage shared image gallery.   |
| <a href="#">az signalr</a>                  | Manage Azure SignalR Service.  |
| <a href="#">az snapshot</a>                 | Manage point-in-time copies of managed disks, native blobs, or other snapshots.  |
| <a href="#">az spatial-anchors-account</a>  | Manage spatial anchor account with mixed reality.  |
| <a href="#">az spring-cloud</a>             | Commands to manage Azure Spring Cloud.   |
| <a href="#">az sql</a>                      | Manage Azure SQL Databases and Data Warehouses.  |

|                                     |   |
|-------------------------------------|---|
| <a href="#">az ssh</a>              | SSH into resources (Azure VMs, etc) using AAD issued openssh certificates.  |
| <a href="#">az sshkey</a>           | Manage ssh public key with vm.  |
| <a href="#">az stack-hci</a>        | Manage Azure Stack HCI.   |
| <a href="#">az staticwebapp</a>     | Manage static apps.   |
| <a href="#">az storage</a>          | Manage Azure Cloud Storage resources.   |
| <a href="#">az storagesync</a>      | Manage Azure File Sync.   |
| <a href="#">az stream-analytics</a> | Manage Stream Analytics.  |
| <a href="#">az support</a>          | Manage Azure support resource.  |
| <a href="#">az synapse</a>          | Manage and operate Synapse Workspace, Spark Pool, SQL Pool.   |
| <a href="#">az tag</a>              | Tag Management on a resource.   |
| <a href="#">az term</a>             | Manage marketplace agreement with marketplaceordering.  |
| <a href="#">az ts</a>               | Manage template specs at subscription or resource group scope.  |
| <a href="#">az tsi</a>              | Manage Azure Time Series Insights.  |
| <a href="#">az upgrade</a>          | Upgrade Azure CLI and extensions.   |
| <a href="#">az version</a>          | Show the versions of Azure CLI modules and extensions in JSON format by default or format configured by --output. |
| <a href="#">az vm</a>               | Manage Linux or Windows virtual machines.   |
| <a href="#">az vmss</a>             | Manage groupings of virtual machines in an Azure Virtual Machine Scale Set (VMSS).                                |
| <a href="#">az vmware</a>           | Commands to manage Azure VMware Solution.   |
| <a href="#">az webapp</a>           | Manage web apps.  |
| <a href="#">az webpubsub</a>        | Commands to manage Webpubsub.   |
